

1. Create a GitHub account.

2. Set up MFA (Multi-Factor Authentication) for the GitHub account using a mobile app.

- Logged in to the GitHub account.
- Opened Settings from the GitHub profile menu.
- Navigated to Password and authentication.
- Selected the option to enable Two-Factor Authentication (2FA).
- Selected the Authenticator App method.
- Installed an authenticator application on the mobile phone.
- Scanned the QR code provided by GitHub using the authenticator app.
- Entered the verification code generated by the mobile authenticator.
- Completed the MFA setup and verification.
- Saved the recovery codes securely.

The image consists of two screenshots of the GitHub web interface. The top screenshot shows the 'Two-factor authentication (2FA) is now enabled for your GitHub account' confirmation page. It features a green checkmark icon, a progress bar with three steps (1, 2, 3), and a green message box stating 'You have enabled two-factor authentication using your authenticator app.' Below this, there is a section titled 'Don't get locked out, configure additional authentication methods' with a sub-header 'Passkeys' and a button 'Add a passkey'. The bottom screenshot shows the 'github.com/settings/security' page. It has a sidebar menu with options like 'Pages', 'Saved replies', 'Security', 'Integrations', 'Applications', 'Scheduled reminders', 'Archives', 'Security log', 'Sponsorship log', and 'Developer settings'. The main content area is titled 'Two-factor methods' and lists several options: 'Authenticator app' (Configured), 'SMS/Text message' (Less secure), 'Security keys', and 'GitHub Mobile' (Configured, 1 device). There is also a 'Recovery options' section with 'Recovery codes' (Viewed).

3. Execute all commands shown in the video.

```

The screenshot shows the GitHub interface for a repository named 'script' by user 'chvkarthik-87'. The repository is public and has 0 stars, 0 forks, and 0 watchers. The main content area shows a commit history table with 1 commit. The commit message is 'chvkarthik-crypto adding files' and it was made 24 minutes ago. The commit details show files 'a', 'b', 'c', 'd', 'dockerfile', 'e', and 'f' being added. The right sidebar contains sections for 'About' (no description), 'Releases' (no releases published), and 'Packages' (no packages published).

File	Operation	Time
a	adding files	24 minutes ago
